

OFFICER DECISION
DIRECTOR OF TRANSPORT AND REGULATORY SERVICES
07 AUGUST 2024

**CONSIDERATION OF THE RESPONSES RECEIVED TO THE STATUTORY
TRAFFIC ORDER CONSULTATIONS TO INTRODUCE RENTAL E-BIKE BAYS IN
DALGARNO WARD.**

1 EXECUTIVE SUMMARY

- 1.1 The number of trips made by rental e-bikes has increased greatly in RBKC over the last few years. However, the parking of rental e-bikes on narrow footways can cause a nuisance, particularly where the footway is obstructed for those using wheelchairs or buggies. In 2023, the creation of designated rental e-bike bays provided users with clearly marked locations in which e-bikes could be left without causing an obstruction.
- 1.2 Between 6 March and 17 April 2024, the Council consulted on the introduction of a new batch of designated rental e-bike bays. Each site that was proposed was selected by the Council to plug gaps in the network of existing bays, or to provide relief to those existing bays that have proved very popular for rental e-bike users and are experiencing overspill of e-bikes into adjacent parking bays, or onto footways.
- 1.3 This report sets out the consultation responses received to the proposals in Dalgarno ward, with a recommendation on how to proceed for each proposal.

2 RECOMMENDATIONS

- 2.1 Following consideration of all comments received, officers recommend that the Director of Transport and Regulatory Services proceed as set out in Table 1.

3 BACKGROUND

- 3.1 The parking of rental e-bikes on narrow footways can cause a nuisance to residents, particularly where the footway is obstructed for those using wheelchairs or buggies. In June 2023, the Council made a Key Decision to implement rental e-bike parking bays, and enter into a Memorandum of Understanding (MOU) with operators to ensure that all rental e-bikes be parked in marked bays. In September 2023, the Council introduced its first designated rental e-bike parking bays for use by e-bike hire operators and their customers, in existing parking bays across the borough.
- 3.2 In general, the creation of the bays has led to a marked reduction in the number of e-bikes left on pavements. However, some users are still opting to end rides on footways and officers have observed that some of the new designated bays have proved very popular for rental e-bike users, leading to some overspilling of the capacity of the bay (typically ten bicycles). The Council wishes to plug gaps in the network of existing bays to help address footway parking, and reduce overspill from existing e-bike parking bays.

4 CONSULTATION RESPONSES

- 4.1 From 6 March to 17 April 2024, the Council undertook consultation on introducing new rental e-bike parking bays at five locations in Dalgarno ward. Residents living near the proposals received letters signposting them to the consultation and the consultation was available on the Council's online consultation and engagement hub. Local ward councillors, residents' associations and community groups were made aware of the consultations by email.
- 4.2 In total, 144 responses were received. Table 1 summarises the responses received and the recommendation on how to proceed. Officers did not agree with the objections in respect of the five proposals and the reasons for this are set out in Section 5.
- 4.3 It is important to note that some respondents asked that their response be applied to every proposed location in the borough. This amounts to an objection to the principle of e-bike parking bays, and whilst people are free to express this position it is not strictly relevant to a consultation on specific sites. However, we have included responses from people who asked for their position to be applied to every proposal in the borough. This means that 12 objections, two 'support in part' and seven 'support in full' responses are not necessarily from residents local to each proposal. Total responses including these responses are indicated in brackets in Table 1. For administrative purposes, these responses and officer responses have been produced separately as Appendix 2. Some of the reasons for these whole-Borough responses also feature in the site-specific comments described in Section 5.

Table 1 – Summary of responses received.

Scheme	No. Objections	No. Support in Part	No. Support in Full	No opinion	Recommendation
S527a. Humber Drive	1 (13)	0 (2)	0 (7)	0	Proceed
S527b. Pangbourne Avenue	7 (19)	0 (2)	0 (7)	0	Proceed
S527c. St Mark's Road	0 (12)	0 (7)	1 (8)	0	Proceed
S527d. Sunbeam Crescent	0 (12)	0 (2)	0 (7)	0	Proceed
S527e. Sutton Way	0 (12)	0 (2)	0 (7)	0	Proceed

5 CONSIDERATION OF OBJECTIONS

- 5.1 Appendix 1 provides comments received from ward Councillors to the proposals.
- 5.2 Appendices 2 – 5 list the responses received to each location in full. No comments were received for the locations at Sunbeam Crescent and Sutton Way. Officer responses to the objections or 'support in part' responses are detailed below:

Loss of parking space

- 5.3 Some respondents were concerned at the loss of car a parking space to accommodate an e-bike parking bay. Respondents to the Pangbourne Avenue locations raised

concerns that there is insufficient parking available to residents, especially in the evenings.

Officer Response

- 5.4 The proposal has arisen following requests from residents to combat the nuisance and hazard that dockless rental e-bikes can cause on footways, particularly for people who have impaired vision or are using wheelchairs or buggies. In order to accommodate the number of bikes that are in circulation in the borough e-bike parking bays need to be at least the size of a car (one car parking space is five metres – providing space for ten dockless e-bikes). Most footways in the borough are not wide enough to accommodate a bay. Consequently, most e-bike bays need to be on the carriageway, usually in existing marked car parking bays (bikes parked on single yellow lines would normally risk causing an obstruction or affecting loading). This reduction in car parking is thus necessary in order for the e-bike operators and users to park the e-bikes in ways that do not obstruct pavements. There are just under 29,000 residents' parking spaces in the borough – far more than available pay-by-phone bays - so the 80 proposed bay conversions to dockless e-bike bays represents less than half of one per cent, if all proposals proceeded. In comparison, residents' permit numbers are around 14 per cent lower than they were in 2013. Parking occupancy data from 2022 shows that on average, around 80 per cent of all bays on Pangbourne Avenue are utilised overnight, with this number reducing to approximately 70 per cent earlier in the afternoons.

E-bikes left on footways/E-bike users do not return e-bikes to designated bays

- 5.5 Some respondents objected on the basis that e-bikes are often left on footways and this posed a hazard to pedestrians, particularly those using wheelchairs or pushchairs.

Officer Response

- 5.6 The main objective of the e-bike bays is to help address the problem of rental bikes being left in inconvenient positions on footways. Whilst some users are still opting to end rides on footways, these riders are subject to increasing fines and in general, the creation of the bays has led to a marked reduction in the number of e-bikes left on pavements. The rental e-bike market is currently unregulated, and so, with the limited legal powers at its disposal to control this problem, the Council regards the provision of more e-bike bays as a crucial part of its efforts to keep e-bikes off pavements. The operators remain responsible for guiding customers to these bays - with warnings and fines in place for non-compliance - and for tidying of designated bays.

There is already a hire bike bay nearby

- 5.7 Respondents to the Pangbourne Avenue proposal said that there was no need for another e-bike bay as there was already a dockless e-bike bay nearby.

Officer Response

- 5.8 Rental e-bike operators are clear that customers will be more likely to comply with designated e-bike parking bays if there is a reasonable density of parking bays so that a customer never has to walk too far to pick up or drop off an e-bike. The Council aims to create a widely distributed network of e-bike parking bays across each ward, ensuring that e-bike users can easily locate bays to start and end their journey, the proposed bay is 170 metres north of the existing bay in Pangbourne Avenue and 270

meters south of the bay in Dalgarno Gardens, such spacings are consistent with an efficient functional network of bays.

Rental e-bikes will attracts strangers to local area and increase anti-social behaviour

- 5.9 One respondent objected on the basis that rental e-bikes will attracts strangers looking for an e-bike rental to a residential area and therefore increase the likelihood of anti-social behaviour and crime.

Officer Response

- 5.10 Whilst some increase in cyclists picking up or dropping off bikes can be expected, this should take no more than a couple of minutes and is not expected to lead to individuals loitering for a period of time. There is no evidence that the presence of rental e-bike bays leads to anti-social behaviour or crime.

Install the e-bike bay in an alternative location

- 5.11 Some respondents suggested alternative locations. One respondent to the Humber Drive proposal suggested that the bay should be on Rootes Drive.
- 5.12 Two alternative suggestions were submitted to the Pangbourne Avenue proposal. One respondent suggested that the bay be relocated to Wallington Avenue, near the junction with St Quintin Avenue, and another responded suggested removing the planters on St Helen's Gardens and Barlby Road to accommodate for e-bike parking.

Officer Response

- 5.13 It is not expected that a further round of consultation will be required using suggestions for alternative locations.
- 5.14 The proposed location at Humber Drive was chosen to provide a well-established network for e-bike parking within the borough, plugging any gaps where e-bike parking is not currently available. The suggestion to move the bay to Rootes Drive is not considered appropriate as placing a bay there would require the loss of a disabled bay or a pay by phone bay, both of which are highly valued by residents, visitors and trades people.
- 5.15 There is an existing e-bike parking bay on Pangbourne Avenue, at the junction with St Quintin Avenue, only a few meters away from the suggested location for a secondary e-bike bay. The proposed location for the Pangbourne Avenue bay, on the northern end of the road, by the junction with Oakworth Road, would release the pressure on the existing e-bike bay, and provide residents and visitors to the Kensington Memorial Park with access to sustainable travel modes.
- 5.16 The Council is proposing to install e-bike bays in the carriageway, in order to reduce clutter on the footway and provide sufficient space on the pavements for pedestrians, especially those using mobility aids and pushchairs. Therefore, it would not be appropriate to relocate the Pangbourne Avenue e-bike bay to the suggested locations on Barlby Road and St Helen's Gardens.

Appendix 1: Ward Councillor Comments

No comments received

Appendix 2: Responses received from respondents wishing their responses to apply to all proposed locations in the Borough

Objection One

Thank you for your letter regarding e-bike parking bays and adding more of these to the area. However, I strongly feel this isn't going to stop people riding them just dumping the bikes and scooters and not returning them to the bays. Several times I have come out of my property to find Lime bikes just dumped right outside or under the Shepherds Bush underpass to name just two. It feels like it is a waste of money and resources to me.

Objection Two

I wish to object to these proposals which will reduce residents' parking in order to accommodate parking for ebikes.

This is further loss of amenity for residents and ratepayers, who are in real need of the use of vehicles and parking. We are a single car household and require a vehicle for business and family purposes. My partner's mother is 97 and immobile so requires a wheel chair and vehicle transport.

Please examine alternatives to accommodate bike parking such as the selective use of pavements and behavioural changes.

Objection Three

Please please stop spending any more money on bicycles – I am fed up with being nearly run over by the endless cyclists on the pavement along Holland Park Avenue. Why don't you spend the money on curtailing their dangerous route along a path supposedly for pedestrians. You are Always happy to promote the cyclists – why do pedestrians get so little support.

Objection Four (The Boltons Association)

I have been asked by the Executive Committee of The Boltons Association to contact you regarding both your general consultation for further rental ebike bays in RBKC and also your specific recent proposals for three further ebike bays in the Boltons Conservation Area.

Our view is that at least until RBKC and the rental ebike operators have managed successfully to control effectively the use of ebike riders, parking arrangements etc, we are opposed to the creation of any further ebike bays. We consider that creating new bays in the present highly unsatisfactory situation will merely promote further unwelcome externalities for local residents.

I should be grateful if our views could be taken into account when the respective consultation responses are considered.

Objection Five

As you are aware, electric vehicles present a serious health hazard.

For example, witness the E-bike explosion outside Buckingham Palace

E-bike 'explodes' outside Buckingham Palace

E-bike fires contribute to a long list of electric car fires, electric bus fires, and so on.

I strongly advise the Council to learn some basic battery chemistry and understand (a) the explosive potential of the ingredients of any Lithium ion battery and (b) the inherent instability of the internal battery membranes that prevent such thermal runaway.

Please keep E-bikes off the streets of Kensington.

Otherwise, it can only be a matter of time before the Council ends up with another type of "Grenfell Tower" problem on its hands.

Objection Six (Earl's Court Square Residents' Association)

We have reservations concerning this proposal.

This is due to issues with the existing ebike bay in Penywern Road.

We have been advised that ebikes are being left in and around the bay, i.e. on the pavement, in Residents' parking spaces including blocking an EV vehicle charging point.

In addition, we have been advised that one of the ebike companies arrive, move their competitors bikes out of the bay putting the competitors ebikes on the pavement etc. as above and then leaving their own ebikes in the designated bay.

It would appear there is no control or oversight on ebikes being dumped outside the designated bays.

Residents' are being told they will lose their Residents' Parking availability to an unruly ebike free-for-all nightmare.

Until reasonable oversight is in place we object to any further expansion of this scheme.

Objection Seven

I wish to object to any expansion of the e-Bike parking scheme until its efficacy is reviewed. People are not parking properly within them as there is no docking system as with the Santander bicycles, so the e-Bike parking area just becomes a jungle of toppled bikes which eventually spread into resident parking bays. I nearly tripped over a toppled bike which had ended up outside the bay over the weekend.

Objection Eight

In response to your consultation about installing multiple new e-bike Rental Bays across the Borough, I am totally opposed to the sheer scale of your proposals. I do not believe for one minute that this will help the problem of e-bikes scattered across pavements. The people who routinely dump bikes wherever they happen to finish their journeys will not be deterred from doing that by more rental bays, but more rental bays will vastly increase the number of people using these bikes and therefore misusing them. I have lost count of the number of times I have had to report bikes strewn across pavements near where I live in South Kensington, just metres from ample existing Rental Bays near the station. Even when a Rental Bay is available at the station, they still even dump bikes on the concourse, instead of parking them properly. In several cases that I have reported, it has clearly been the same offender, repeatedly leaving bikes in the same places, on side-street pavements in South Kensington, day after day. And this behaviour only appears to cease when I have apparently persuaded the relevant e-bike firm to block that user from renting their bikes.

Objection Nine

Reference your letter of March 6th you invited my thoughts on extended E- Bike Parking in London so here they are - based on living in Hans Road which already hosts too many Uber bikes!

In your note you indicated that additional parking is being considered for E bikes hopefully well away from Hans Road where we are more than fed up with their macho cycling behaviour and failure to park properly.

I experience their lack of consideration virtually every day whether it's riding down the pavements or not parking properly in the space provided behind Harrods. For whatever reason too many of them prefer parking individually across the entrances to the pavements of Hans Road or against the wall of the pavement leading to Hans Place - all of this in preference to the actual parking space even when space is available.

Almost every day I drag one of these bikes to the side to clear the pavement or crossing - otherwise it becomes too difficult for old folk or children to cross safely.

Some Uber riders clearly feel they are not subject to common standards and respect for other people which is why I am concerned about your plans to expand parking specially for Uber/e-bike users

I feel strongly that parking can only be increased if Uber can develop a financial system to ensure Uber riders have to pay for their parking space. I don't know how it can work but in today's techy world it doesn't seem impossible. Right now Uber riders apparently switch off when parked to avoid paying for the bike while not in use - perhaps a parking mode at a premium price can be introduced for e-bikes?

It seems to me that cars and motor bikes park in metered or designated areas and Red bikes have their numerous designated parking areas as well. But Uber riders seem to think they have the right to go anywhere and park anywhere without any consideration or responsibility to others.

I do feel strongly that Uber has to come up with ways to discipline/charge their riders with regard to parking before the Council offers further parking space - this must be a two way deal before anything further goes ahead

I hope this short note is helpful - it certainly encapsulates what my family and friends think.

Objection Ten

I object ebikes

Objection Eleven

Hello I do not agree on the addition of e-bike parking in this, or any location. Creating parking zones certainly encourages their use and their promotion by the e-bike companies. The consultation should first answer the question of whether residents want to encourage e-bike activity in the area! The answer would almost certainly be "no" given the way e-bikes are ridden and 'parked'. The parking designation does in no way prevent the e-bikes littering the surrounding areas.

Objection Twelve

I believe that these cycle hire boxes should not replace people's personal disabled parking bays as highlighted in some of the proposed locations, this is because the parking and poor management of these dockless bikes already causes much aggravation for people with disability and mobility issues as well as older members of our community. Given the large expansion we have seen recently of these dockless eBikes and the continued reckless nature with which they are used and parked in our communities the operators have not been held accountable enough and are not holding their customers accountable. I believe that the expansion of 80 more bays within our communities for these operators will lead to another expansion with more eBikes flooding our streets and creating hazards all for the gain of private companies, not our community. The borough should be ensuring that these companies are operating within clear rules and guidelines, controlling the size and placement of their fleet and reimbursing the community for the inconveniences caused by their operation. Only at that point should they be allowed to expand their reach further when it is clear they are responsibly and sustainably managing their current operation, otherwise the introduction of 80 new parking bays will not result in better distribution of their fleet but instead more bikes entering the streets of London and creating hazards and obstructions that local resident have to live with.

Support in Part One

Many users choose to park the bike they have just used in a place that is most convenient for them, so typically close to their home. This has the added advantage that if it is off the beaten track, there's a decent chance the bike will still be in situ when next required. In the Royal Hopsital ward there have been many instances of e-bikes being parked inconsiderately for other pavement users.

I am a cyclist myself, and think that anything that boosts cycle usage in London is to be applauded, but I can't see the incentive for people to use the dedicated parking spaces. So long as there is no penalty for parking away from a dedicated area the problem will persist.

[Additional Comments]

It was a general point - not specific to a particular parking bay. In the absence of any incentive or penalty surely people will continue to park where it is convenient, rather than going to the trouble of seeking out a parking bay and then walking to the final destination.

I accept that in areas like the Kings Road people may choose to use the parking areas, but once in the sidestreets I can't see why they would bother.

Support in Part Two

I think it would be better to have this rental bike bay at The Earls Court road end of Cope Place and use a pay by phone bay and not a resident bay. If you go ahead will you create a replacement resident bay near by. The same goes for all proposed bays all round our borough.

Support in Full One (WestWay Trust)

Please accept this as organisational response from the WestWay Trust to the consultation on rental e-bike parking bays. Our general comments of support refer to all the dockless bays in the proposal and specifically we support the following proposed cycle bay locations for the reasons outlined below;

- S529a Appleford Road
- S529b Cambridge Gardens
- S529c Elkstone Road
- S529d Murchison Gardens
- S529e Southern Row
- S529f Telford Road
- S525a Arundel Gardens
- S525b Basing Street
- S525c Colville Terrace - No. 31 Colville Gardens
- S525d Colville Terrace - No. 101 Ledbury Road
- S525e Stanley Crescent
- S531b Ladbroke Road
- S531c Lansdowne Walk
- S531d St John's Gardens
- S531e Swanscombe Road

Environmental well-being in North Kensington is one of the 3 pillars of our long-term strategy at Westway. The Trust fully supports the stated aim within the Councils Air Quality Action Plan of RBKC to "reduce the need for cars by promoting and making active travel such as cycling accessible and enjoyable". As a general comment providing convenient locations of dockless bays across the borough is important for making cycling accessible and providing good alternatives to car journeys. This is one important part of reducing air pollution in North Kensington and enabling healthier and more active lifestyles. This is an important part of addressing health inequalities that are exacerbated by air pollution and inactive lifestyles.

In support of the specific locations referred above, the Trust fully supports the increased provision of bays in the local vicinity. Firstly, locating these on the road carriageway reduces the potential conflict with pedestrians. Not only does it reduce pavement obstructions this also avoids the need or temptation for cycle hires to mount/ ride on pavements to access bays. Where a parking bay is lost, the benefits hugely outweigh the small impact of losing one parking space which can accommodate six or more bikes.

It is right that the council has been addressing inappropriately parked bikes that cause obstructions to pedestrians and welcome the combined efforts to ensure dockless cycle hire remains convenient and enjoyable to use. For dockless bikes to remain a viable choice, it is good to see RBKC recognising bays

are only as good as their convenience/ availability. The further people must travel to a dock the more likely they are to park it somewhere inappropriately and in long term undermines the desirability of rental bikes if they do not meet people needs when travelling. They are also an important part in meeting a clear need across neighbourhoods where most households do not have access to a car and do not necessarily have easy access to alternatives such as Santander docks for example. Cycling remains a key part of reducing car journeys and convenient dockless bays are a vital part of this.

We support the additional proposed locations especially around popular destinations such as Portobello Market, the WestWay estate, Notting Hill. It is an imperative to provide bays in and around popular destinations that are accessible and convenient especially for non residents who will not be familiar with local infrastructure.

These locations are much needed as local bays are noticeably congested with the existing bays evidently over subscribed and spilling over regularly into adjacent parking bays. They are also clearly regularly used with bays emptying in the morning and filling up towards the end of the day. Equally the continued instances of dockless bikes being left outside of designated bays indicates current provision is not meeting the growing need for conveniently located bays.

This proposal is the right thing to do in a borough striving to be greener, safer and fairer.

Thank you for taking the WestWays views into consideration

Support in Full Two (Better Streets for Kensington and Chelsea)

Please accept this as organisational response from Better Streets for Kensington and Chelsea

Better Streets fully supports all the proposed locations therefore please accept our response as applying to each individual proposed location in the consultation.

We support efforts to enable people to be more active when travelling in and around RBKC and making active transport as accessible as possible to everyone living, working, studying in or visiting the borough.

Locating these on the road carriageway reduces the potential conflict with pedestrians. Where a parking bay is lost, the benefits hugely outweigh the small impact of losing one parking space which can accommodate six or more bikes. In regards to the proposed Holland Park Avenue bay, we would suggest this ideally would be located on a nearby side street on the carriageway close to the junction with HPA to avoid increased pavement clutter.

Better Streets welcome the councils efforts to address inappropriately parked bikes that cause obstructions to pedestrians and welcome the combined efforts to ensure dockless cycle hire remains convenient and enjoyable to use.

The further people must travel to a dock the more likely they are to park it somewhere inappropriately and in the long term undermines the desirability of rental bikes if they do not meet people needs when travelling

These locations also address important gaps in current provision and improve accessibility in neighbourhoods and wards where most households do not have access to a car and may not necessarily have easy access to alternatives such as Santander docks for example. Cycling remains a key part of reducing car journeys and providing convenient dockless bays is an important part of offering attractive alternatives.

These locations are much needed as local bays are noticeably congested with many existing bays evidently over subscribed and spilling over regularly into adjacent parking bays. They are also clearly regularly used with bays emptying in the morning and filling up towards the end of the day. Equally the continued instances of dockless bikes being left outside of designated bays points to a gap in current locations and indicates current provision is not meeting the growing need for conveniently located bays close to where people want to travel to.

There remains a need to make dockless bays intuitive especially when not familiar with local area such as visitors. Increasing coverage is part of addressing this. We would suggest a dockless bay at every junction would improve how people use bays and reduce the need to hunt around for a bay when the apps prevent parking bikes outside of designated areas. There is also a need to improve mapping of these bays and visibility on map apps and in the real world (although regular bays at junctions would address much of this)

Support in Full Three

I have read the pdf with the proposed new docking bays. I have lived in Kensington for 41 years and know the majority of the streets where you are proposing docking stations. I am vehemently in favour of your proposals. It will encourage even more people to take up e-bikes and leave their cars at home. I use e-bikes all the time when they are near enough - they often are not. This will transform usage.

And there is a small chance that it will therefore the use of the ever-wider, ever-more polluting SUVs that blight our borough and our city. Whenever I pass Thomas's schools near me at arrival or departure time, at least one of them is idling its engine. Occupants are offended and aggressive when I tell them that is illegal. Every trip that one of them does not make is a small victory in the fight against air pollution, visual pollution, carbon emissions. (And entitlement....) Thank you for your work on this subject.

Support in Full Four

I wanted to provide a brief note of support for creating additional bays for e-bikes.

Weather permitting(!) I take an e-bike from the bay opposite #5 Cadogan Gardens frequently, as we currently live on Cadogan Gardens.

We also plan to move soon to [redacted]. We'd be supportive specifically of creating a bay [in] Victoria Road.

The only point of concern is that some users aren't as diligent in parking their e-bikes sensibly.

Some bays are also often overly full and have too many bikes parked together too closely. Particularly in windy weather, this can see e-bikes topple over and a full bay of them scattered like dominoes / litter on the ground.

Hopefully users and operators can do more to avoid this and the creation of more bays will alleviate this problem!

Support in Full Five

I am in favour of ALL of these proposals. Congratulations and thank you.

Support in Full Six

I favour any proposal which reduced the number of e-bikes clogging up our pavements. I support this and the other proposals in this consultation on condition that they will be accompanied by making it illegal to continue to leave e-bikes in the places in which they are currently being left.

Support in Full Seven

This consultation is rather odd! I'd like to make a general comment that there seem too few stations... and wonder why we can only comment on one location (or so it seems to now... the main thing is that one should easily be able when going from area to area to know where the nearest 'station is' and, as I have said, there seem to be too few!

Officer responses to objections

Loss of parking space / Use pay-by-phone bays instead of residents' bays

The proposal has arisen following requests from residents to combat the nuisance and hazard that dockless rental e-bikes can cause on footways, particularly for people who have impaired vision or are using wheelchairs or buggies. In order to accommodate the number of bikes that are in circulation in the borough e-bike parking bays need to be at least the size of a car (one car parking space is five metres – providing space for ten dockless e-bikes). Most footways in the borough are not wide enough to accommodate a bay. Consequently, most e-bike bays need to be on the carriageway, usually in existing marked car parking bays (bikes parked on single yellow lines would normally risk causing an obstruction or affecting loading). This reduction in car parking is thus necessary in order for the e-bike operators and users to park the e-bikes in ways that do not obstruct pavements. There are just under 29,000 residents' parking spaces in the borough – far more than available pay-by-phone bays - so the 80 proposed bay conversions to dockless e-bike bays represents less than half of one per cent, if all proposals proceeded. In comparison, residents' permit numbers are around 14 per cent lower than they were in 2013.

E-bikes left on footways/E-bike users do not return e-bikes to designated bays/There is no enforcement of e-bikes

The main objective of the e-bike bays is to help address the problem of rental bikes being left in inconvenient positions on footways. Whilst some users are still opting to end rides on footways, these riders are subject to increasing fines and in general, the creation of the bays has led to a marked reduction in the number of e-bikes left on pavements. The rental e-bike market is currently unregulated, and so, with the limited legal powers at its disposal to control this problem, the Council regards the provision of more e-bike bays as a crucial part of its efforts to keep e-bikes off pavements. The operators remain responsible for guiding customers to these bays - with warnings and fines in place for non-compliance - and for tidying of designated bays.

Rental e-bikes are an eyesore

To a large degree, visual appearance is a matter of subjective taste. Some people may prefer a row of bicycles parked on-street than a car. Both types of vehicle are commonplace across London. There is no evidence that the presence of rental e-bike bays leads to lower property values, or an increase in litter. Whilst some increase in cyclists picking up or dropping off bikes can be expected, this should take no more than a couple of minutes and is not expected to lead to individuals loitering for a period of time.

Proposals do not benefit residents

Rental e-bike operators are clear that customers will be more likely to comply with designated e-bike parking bays if there is a reasonable density of parking bays so that a customer never has to walk too far to pick up or drop off an e-bike. The Council is keen to encourage travel by more sustainable modes in line with Council policies relating to a cleaner, greener borough, improving air quality and reducing congestion. The Council will have access to data on the use of each bay and will therefore be able to identify and consider removing any bays that are poorly used.

Proposals should not replace people's personal disabled parking bays

None of the proposals are proposed in disabled parking bays.

Dangerous cycling

Whilst a small minority of people who cycle may exhibit poor cycling behaviour, this is not a reason to refuse to install rental e-bike parking, in the same way the Council would not refuse to provide car parking because a small minority of people who drive contravene traffic rules.

E-bike/e-scooters are fire hazards

The article quoted relates to a privately owned e-bike. The Council is unaware of any fires caused by rental e-bikes, however it is important to remember that the Council currently has no choice whether to have dockless e-bikes in the borough or not. The Council has no powers to prevent operators operating. Regulation to improve ebike safety can only be introduced by the Government.

There is no docking system so the e-Bike can topple over and spread into residents parking bays.

The Council has no powers to prevent operators operating, and no powers to force operators to operate under a docked model. The Council has decided not to introduce infrastructure in ebike parking bays (such as Sheffield stands) for streetscape and financial reasons. The operators remain responsible for tidying of designated bays and ensuring they are not over capacity.

Opposed to the principle of providing designated e-bike bays

Provision of designated e-bike parking bays is Council policy following a Key Decision¹ in June 2023. The Council has no plans to revoke this policy at the present time. Even if the Council did not provide designated e-bike bays, the e-bikes would remain on the Council's streets as it has no powers to prevent the companies operating.

¹ Key Decision 06363/23/T/AB Dockless Rental E-Bike Parking Bays - <https://rbkc.moderngov.co.uk/Committees/mgIssueHistoryHome.aspx?IId=4599&Opt=0>

Appendix 3: Responses received for proposed e-bike bay in Humber Drive

Objection One

This proposed e-bike space in the middle of the estate.

It may encourage people to come into the estate that have no business I. The estate other than to look for a an e-bike.

This could encourage crime.

If you have to place it anywhere

The ideal place for this e-bike parking would be Rootes drive

Which is residents bays and is not directly in the middle of the estate but close to barlby road and the estate so can be seen from outside, no entrances to anyone's homes.

[Additional comments]

I object to the placement of this dockless bike park.

I am a full time wheelchair user.

My parking bay in the proposal is on the opposite side of the road.

I have been inconvenienced on many occasions in other areas by not being able to get past when people leave the bikes on the ground as opposed to standing them in an upright position. Near my car door meaning I am unable to get into my car etc.

At my workplace near Avondale park Road - I am often unable to walk around the block of Runcorn Place and Hesketh Place because either bikes have been thrown on the floor, or passing cars knock them down!!

I definitely do not wish to live opposite a dockless e-bike bay as well.

The pavement adjacent to the proposed placement is accessed by many people/children using the the park in the middle of Humber drive/Hillman drive and Shrewsbury street. This will be a total obstruction the middle of the housing complex. We have many disabled people who live on the housing complex. Who need ease of movement around the pavements and streets.

This also reduces the already highly used residents parking bays on Humber Drive.

Can I suggest you place it in Rootes drive

Which will be strategically placed to capture both people from inside and outside the housing complex. There are no entrances to anyone's home just after the disabled parking bays which are situated on the left and right hand side of Rootes Drive - the only cars/people who will be inconvenienced are the cabs/chauffeurs that park then while waiting for patrons Attending the carpenters gallery on Barlby Road who majority not residents of the Rootes Estate.

Appendix 4: Responses received for proposed e-bike bay in Pangbourne Avenue

Objection One

There is an e bike park already on this street .

There is not room for 2 bike parks , parking is limited anyway , I pay a lot for a parking permit .

People don't tend to even put the bikes in the designated bays , so cutting down even more parking bays .

Objection Two

We already have a parking bay for e-bikes on the opposite end of the street at corner with st quintin avenue; we already have no sufficient resident parking spaces on the street as a lot of spaces are pay and display bays ; often i have to park in nearby roads as there are no resident spaces left and only lots of pay and display which are mostly unused during the day

Objection Three

We wish to object to the proposed new e-bike parking bay opposite No 43 Pangbourne Avenue because we already have one at the southern end of this short road opposite the Princess Louise Nursing Home and the Montessori School, where e-bikes are not left carefully / properly and are often untidy and dangerous.

At this location opposite No 43 there are Charging Points too.

Please find a different location for more e-bikes.

Objection Four

There is already one e-bike Parking Bay in Pangbourne Avenue which takes up car parking space - two e-bike parking bays in one short street seems unreasonable when parking spaces are often difficult to find, especially in the evenings. There are always cars parked in the east side of Pangbourne opposite No. 43. and there is already an electric power point on a lamppost in the area referred to. There is a possible space in Wallingford Avenue near the junction with St Quintin Avenue, but please not another e-bike Parking Bay in Pangbourne Avenue. Several residents of the street are elderly and parking near one's house is essential to avoid a lot of walking.

[Additional Comments]

I am writing about the proposed e-bay parking space proposed for Pangbourne Avenue. I object to the proposal for a second bike parking space in this short street. We already have one at the St Quintin Avenue end of the Avenue - why should we have two in one short street when there is no bike parking space in Wallingford Avenue? This is a continuation of Pangbourne Avenue, a much longer street and much nearer the shops. There is also an electric power point in a lamppost in, or very near, where new bike park is proposed. Many of the residents of Pangbourne Avenue are elderly and even now, if we go out in the evening, it is often difficult to find a parking space on our return.

e-bike rental bays may be necessary but please re-consider the one you are proposing for Pangbourne Avenue. This objection is not unreasonable as we already have a bike parking space in this street and parking of cars is difficult, particularly in the evenings.

Please consider another more suitable street in this area and bring this objection to the notice of those considering the suitability of spaces. Thank you.

Objection Five

Car parking is at a premium on Pangbourne Avenue. Any further reduction in resident parking areas can only exacerbate the problem. It is unfair on those residents who have to pay a not insubstantial amount for the right to park in their own road, that they should be further restricted in that opportunity.

Objection Six

There are hundreds of people living in the Borough in new housing blocks that cannot get residents parking as you say that there are not enough parking spaces yet you want to give up prime spots for these bikes and Scooters.

Why don't you remove the new planters you have installed in St Quinton's Avenue/ St Helens Gardens and Barlby Road/Dalgarno Gardens and utilise that space as these are more suitable as they are larger spaces with still room for pedestrians to walk around safely.

It appears to me that this is just lazy inconsiderate planning by the Town Hall.

Objection Seven

Pangbourne Avenue already has a dedicated space for parking rental bikes and residents find it difficult to find space to park their car, mainly because residents from the Argyle Place development also park cars in the street, despite having parking spaces underground. As this is quite a short street the space for parking is limited and removing more residents' parking spaces will not improve this. A number of residents who live in surrounding streets also park their cars in this street, rather than using spaces near their homes.
